Dear Valued Customer,

We are proud to present the 14th annual Maryland Correctional Enterprises (MCE) catalog, a comprehensive listing of our quality products and services. This catalog is designed with you, our customer, in mind and offers an easy to use method to select and purchase the items necessary to compliment your office, work space or any business need.

As the prison industry arm of the Maryland Division of Correction (DOC), MCE consists of 26 business units located at correctional facilities across the state. While working to produce exceptional products and services, MCE also provides inmates with much needed job skill training. Unlike other vendors in the manufacturing industry, our mission is to teach our inmate employees strong work ethics, increased responsibility and self-esteem to create positive personal change. Studies across the nation continue to show that correctional industries have a positive effect on reducing states' recidivism rates, which ultimately contribute to more productive citizens and safer communities.

In order to increase the amount of training offered to our offender population, MCE is dedicated to manufacturing superior products at affordable prices while providing excellent customer service. Our product line varies widely to meet a full range of business requirements and features furniture for offices, reception areas, libraries, dorms, lounges and outdoor settings. Additional products and services include furniture restoration, food products, office supplies, apparel, cleaning products, mailing and distribution, data entry, warehousing, laundry and printing.

MCE is committed to helping you find the perfect solution for your business needs. Our Account and Customer Service Representatives are available to assist you in the selection process and our in-house Design and Installation team is ready to help with the layout, design and set-up of your furniture purchases.

We hope you enjoy this year's edition of the MCE catalog. Please visit our e-commerce website, www.mce.md.gov, to receive our latest news and updates. Orders can be placed online or by phone, fax or email. We also offer a variety of payment methods to accommodate your needs. Sample upholstery, panel, apparel fabric colors and furniture color and hardware selections can be found online.

Your continued support of Maryland's premier rehabilitative program is greatly appreciated. We look forward to working with you to help you achieve your business goals.

What features should a good ergonomic chair possess?

Many office employees spend an average of 8 hours per day in a chair. Safety experts agree that the correct chair is one of the most important pieces of equipment in many workplaces. Time after time research points to quality ergonomic chairs as being the key to happy, productive workers.

Seat height - Office chair seat height should be easily adjustable.

Seat width and depth - The seat should have enough width and depth to support the user comfortably.

Lumbar support - The chair should have a lumbar adjustment (both height and depth) so each user can get the proper fit to support the back.

Backrest - The backrest should be adjustable in height and angle with a locking mechanism to secure it from going too far backward.

Seat material - The seat should have enough padding to be comfortable to sit on for extended periods of time. Fabric that breathes is preferable.

We believe that every desk, every chair, every shirt and every business card is an opportunity for an inmate to learn. And learning has been proven to inspire growth. When a person is sent to prison, they can choose idleness - or they can choose productivity. They can choose to do nothing - or they can choose to do something. At MCE, we are that something.

A Historic MCE Pilot Printing Press

Chandler & Price was founded in 1881 in Cleveland, Ohio, by Harrison T. Chandler and William H. Price. They manufactured machinery for printers including a series of hand-fed platen jobbing presses, as well as an automatic feeder (the Rice Feeder), paper cutters, book presses and assorted equipment. Despite dominating the industry in the 1930s, by the 1950s the offset printing industry had eclipsed the world of movable type printing, and only Chandler & Price and Brandtjen and Kluge continued to make open platen (Gordon) presses. Chandler & Price ceased production of presses in 1964.

The Pilot was designed and sold as a press for small job, short-run printing in commercial shops as well as for teaching letterpress printing in high school or industrial trade school print shop classes. On it, the student could learn all they would need to know about set up and make ready of a hand-fed platen press, and could do it with a machine that was less expensive, safer and could fit into a classroom.

When you buy from MCE, you're not just buying a product - *you're changing a life.*

At MCE, we offer more than just products and services. Every item that you purchase from us has been built or assembled by inmate workers serving time at a state correctional institution in Maryland. As the prison industry arm of the Division of Correction, MCE is an effective correctional industries model for preparing offenders for employment upon release.

We believe that every desk, every chair, every shirt and every business card is an opportunity for an inmate to learn. And learning has been proven to inspire growth. When a person is sent to prison, they can choose idleness - or they can choose productivity. They can choose to do nothing - or they can choose to do something. At MCE, we are that something.
